

Techniq's Blue Bird

TECHNIQ'S BLUE BIRD

Blood Donation Vehicle

Techniq's Blue Bird is a convenient Blood Donation Vehicle that promotes voluntary blood donation. The Mobile Blood Donation Unit will serve as a travelling reminder of the reason why blood donation are needed. The bus will make BLOOD DONATION more convenient for donors. The bus is equipped with two private donor interview booths and four electrically controlled reclining donor beds for easy donation of blood. The spacious and flexible interior room offers the best condition in blood donor care for its functionality and accessibility. Unlike conventional designs involving complex and cost-intensive special constructions mounted on semitrailers, our design solutions can be installed on a bus or van or truck, thus bringing clear cost advantage for the client since it enables usage of standard components. Blue Bird provides optimal ergonomic and healthy ambience with private interview rooms, comfortable donation beds, extensive cabinetry for medical equipment, stainless steel sink with large water reservoir for washing and cleaning, windows with pull down louvers for natural light entrance, and convenient reception and refreshment area.
