

Techniq's Phoenix

TECHNIQ'S PHOENIX

Mobile ICU

Techniq's Phoenix, is a well-equipped Mobile Intensive Care Ambulance. Mobile ICU offers the same diagnostic and treatment facilities as a stationary hospital ICU, but when clients are in search of lower cost options with regard to the installed equipment, Phoenix offers the best of both worlds. It offers not only an unbeatable price-performance ratio, but also maximum system safety. It has room for highly trained paramedics, who are dispatched to emergency situations, where patients require a higher level of care than a regular ambulance can provide. It is equipped with state-of-the-art Advanced Life Support (ALS) systems, and is designed for ambience – light, space, compartments – to support paramedics to provide life-sustaining assistance.

FEATURES

▲ Ergonomic interior with optimal work environment for EMS specialists

Aerodynamic roof design incorporated with LED warning lights (2 clear flashers & 2 red flashers & 2 oscillators) for greater visibility

Ergonomically designed interiors with optimal lighting (roof lights, handheld light, ect.)

Multiple control for heater or A/C systems as per treatment/patient care requirements (with prewiring for inverter)

Dual protection with inside/outside locking latches for the double doors

2 rows of LED / Halogen fluorescent, dome lighting in interior ceiling with dimmer

Advanced control with separate front and rear OEM console for power distribution to emergency lights points and sirens

Hand-held spotlight with momentary switch, hard wired, to driver's seat base with alternate option of mounting location

200-watt electronic siren with Microphone located in front console and 2 nos. of 100-watt speaker mounted under front bumper
